

## Ethics and Professionalism

Join the certification board for a 3-hour continuing education training on ethics and professionalism. We will spend time unpacking these terms together. What do they mean when we put them into daily practice? How does professional behavior increase adherence to ethical practice? Why do we require continued education on ethics when many of us have had a ridiculous number of trainings that focus on ethics? We will explore reality-based examples of ethical breaches and the environments and lapses in judgement that may help produce them. Finally, we will talk about ways to improve our professional environments and how we can ensure that we are improving our own ethical and professional conduct.

A camera and microphone are required.
